Other Events

As of September 30, 2015, the total number of our active kiosks in Russia was 98,141, a decrease of 20% compared with 122,982 active kiosks as of June 30, 2015. The decrease resulted primarily from the enhanced controls that the Central Bank of the Russian Federation has implemented to ensure compliance by agents with legislation that requires agents to remit their proceeds to special accounts, as disclosed in our Form 6-K filed on September 24, 2015. There has been no significant change in the number of our kiosks in Russia since September 30, 2015. Management believes that other participants in the kiosk market are experiencing similar trends.

The number of our kiosks as of a particular date is calculated as an average of the amount of active kiosks for the last 30 days preceding such date (with only those kiosks and terminals being considered active through which at least one payment has been processed during the day).

Although this decrease negatively affects the size of our physical distribution, management continues to believe that increased transparency in the kiosk market will ultimately allow us to improve our share of this market.
