Fourth-Quarter 2014 Results

Revenues: Total Adjusted Net Revenue for the quarter ended December 31, 2014 was RUB 2,468 million (\$43.9 million), an increase of 45% compared with RUB 1,700 million in the prior year.

Payment Adjusted Net Revenue was RUB 1,838 million (\$32.7 million), an increase of 41% compared with RUB 1,305 million in the prior year. Payment Adjusted Net Revenue growth was predominantly driven by an increase in payment volume in the E-commerce and Money Remittances market verticals and net revenue yield in the E-commerce, Financial Services and Money Remittances market verticals, slightly offset by a decrease in payment volume and net revenue yield in the Telecom market vertical.

Other Adjusted Net Revenue, which is principally composed of revenue from inactivity fees, interest revenue and gain from currency swaps and overdrafts provided to agents, revenue from rent of space for kiosks and sale of kiosks, cash and settlement services and advertising, was RUB 630 million (\$11.2 million), an increase of 59% compared with RUB 395 million in the prior year. The growth in the fourth quarter was mainly due to increase in net revenue from sales of kiosks and rent of space for kiosks. Inactivity fees for the fourth quarter were RUB 183 million (\$3.3 million) compared with RUB 137 million in the prior year. Other Adjusted Net Revenue excluding revenue from fees for inactive accounts increased 73% compared with the same period in the prior year.

Total Adjusted Net Revenue excluding revenue from fees for inactive accounts increased 46% compared with the same period in the prior year.

Adjusted EBITDA: For the quarter ended December 31, 2014, Adjusted EBITDA was RUB 911 million (\$16.2 million), an increase of 24% compared with RUB 733 million in the prior year. Adjusted EBITDA growth was mainly offset by heavy marketing and advertising expenses which amounted to RUB 400 million in the fourth quarter 2014 as compared to RUB 125 million in the prior year. Adjusted EBITDA margin (Adjusted EBITDA as a percentage of Total Adjusted Net Revenue) was 36.9% compared with 43.1% in the prior year. Adjusted EBITDA excluding inactivity fees was RUB 727 million (\$12.9 million), an increase of 22% compared with RUB 596 million in the prior year. Adjusted EBITDA margin excluding inactivity fees was 31.8% compared with 38.1% in the prior year. The substantial amount of marketing spent in fourth quarter 2014 was unusually high, due to launch of the vast majority of advertising and promotion campaigns, which we originally planned to spread more evenly throughout the year. Moving forward our intention is to spread marketing and advertising campaigns and thus the budget more evenly, therefore we assume EBITDA margin for the full year 2014 to be more representative than the EBITDA margin for the fourth quarter of 2014.

Adjusted Net Profit: For the quarter ended December 31, 2014, Adjusted Net Profit was RUB 597 million (\$10.6 million), an increase of 5% compared with RUB 567 million in the prior year. The increase in Adjusted Net Profit was primarily driven by the same factors impacting Adjusted EBITDA. Adjusted Net Profit excluding inactivity fees (net of tax) decreased 1% compared with the prior year.

Other Operating Data: For the quarter ended December 31, 2014, total payment volume was RUB 175.2 billion (\$3.1 billion), an increase of 10% compared with RUB 159.3 billion in the prior year. Average payment net revenue yield was 1.05%, an increase of 23 bps compared with 0.82% in the prior year. The increase in payment volume and average payment net revenue yield in the fourth quarter was mainly driven by strong growth in the E-commerce, Financial Services and Money Remittances market verticals.

The total average Net Revenue Yield was 1.41%, an increase of 34 bps as compared with 1.07% in the prior year. The total average Net Revenue Yield excluding the effect of inactivity fees was 1.31%, an increase of 33 bps as compared with the same period in the prior year.

Payment Adjusted Net Revenue growth was predominantly driven by an increase in payment volume and net revenue yield in the E-commerce, Financial Services and Money Remittances market verticals, slightly offset by a decrease in payment volume and net revenue yield in the Telecom market vertical.

Adjusted EBITDA excluding inactivity fees was RUB 4,161 million (\$74.1 million), an increase of 71% compared with RUB 2,429 million in the prior year. The number of active kiosks and terminals was 181,148, an increase of 8% compared with the prior year, primarily driven by execution of new rental agreements with certain federal retail networks. The number of active Visa Qiwi Wallet accounts was 17.2 million as of the end of 2014, an increase of 1.8 million, or 12%, as compared with 15.4 million in 2013.

Recent Developments

Dividend: In light of the current geopolitical concerns around Russia and its negative impact on the economy and liquidity management believes it is prudent not to declare a dividend for the fourth quarter. We will revisit this decision each quarter moving forward with an intention to return to our historical payout levels.

M&A: From time to time, we have evaluated and expect to continue to evaluate possible acquisition transactions, partnerships or joint ventures on an on-going basis, some of which may be material. At any time, including currently, we may be engaged in discussions or negotiations or diligence evaluations with respect to possible acquisitions, partnerships or joint ventures or may have entered into non-binding documents in relation to such transactions. As part of our strategy, we intend to continue our disciplined approach to identifying, executing and integrating strategic acquisitions.

2015 Guidance¹

QIWI provides its guidance in respect of 2015 outlook:

- Total Adjusted Net Revenue is expected to increase by 12% to 16% over 2014
- Adjusted Net Profit is expected to increase by 12% to 16% over 2014

We have started to note the effects of the macroeconomic slowdown in Russia in the second half of 2014 and especially in Q4, which we believe can be long lasting and could have a significant negative effect on both consumer spending and the banking system in Russia and, accordingly, on our business in the future. The extent of the slowdown, and if that were to result in a full scale banking crisis, is yet to be assessed. We, therefore, do not currently have enough visibility on our Total Adjusted Net Revenue and Adjusted Net Profit in 2015. We provide the 2015 guidance based on our current understanding of the macroeconomic situation, which is subject to change. We reserve the right to revisit our 2015 guidance in case we see the situation changing throughout the year. Expected growth of Adjusted Net Profit equals to the expected growth of Adjusted Net Revenue as a consequence of our desire and commitment to invest into new products and gain market share in 2015.
